GermsSpreadinSkin

Eczema, Psoriasis and other skin troubles are caused by myriads of germs at work in the skin. Unless these germs are promptly destroyed they rapidly multiply, gnawing their way deep into the sensitive tissue. This is what causes that awful itch, and what seemed a mere rash may grow worse and develop into a loathsome and torturing skin disease with its years of misery.

Don't take any chances! Destroy the germs at the beginning of the trouble with that seething and cleansing wash, the D. D. Prescription for Eczema. A 25c bottle will prove this to you.
